

# DELTA-stat IP™

## SCORING AND GRAPHICS FOR MULTISPORT LIVE PRODUCTION

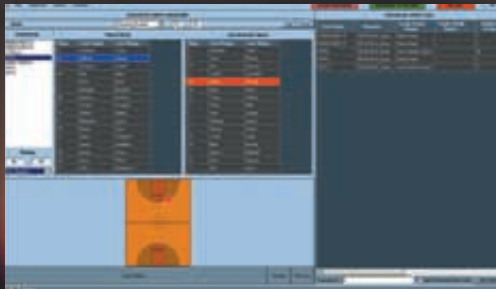

**DELTA-stat IP** is a complete turnkey solution designed to generate and display 2D and 3D graphics for multisport live productions such as pre-game presentation, clocks, animated scores, statistics management, actions, game information, clips, referee decisions...

**DELTA-stat IP** features ease game's preparation and sequences for live production:

- **Advanced Database Engine:** Input information about referees, commentators, players classified by sport, team, and nationality. Each field can be customized to store various type of information such as age, height, weight, rank, position...

Pictures and videos can be attached to each entry form.

- **Intuitive Graphic Design Tool:** Create customized graphics, using information from the database, insert logos, titles, clips, animate and synchronize them to deliver high-end quality graphics.
- **User Interface:** Each sport has a dedicated user interface to manage live production, from which the operator can instantly target graphics according to actions, enter statistics, and display panels to give information about the team, the players, statistics, game results...

- **Timer:** Every timer design can be adapted to each sport, to display various timing information during the game.

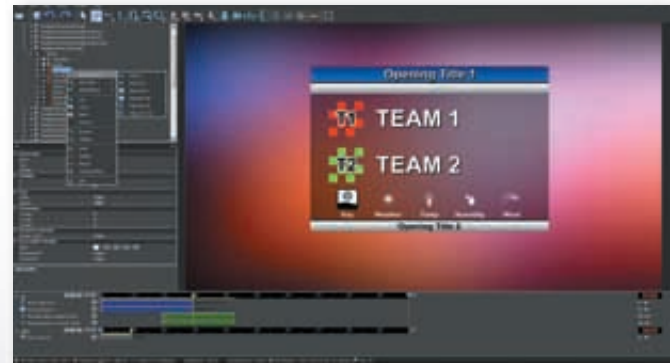

- **Statistics:** dedicated module to enter statistics in live transmitted in real time to the database. Types of statistics are completely customizable by the end-user.

**DELTA-stat IP** complements perfectly NewTek TriCaster and 3Play systems and rounds out your control room equipment for live video production. It's also the perfect tool for displays and big screens in stadiums and sport arenas.
