

3D Storm introduce Telycam as a new partner

3D Storm is proud to announce their partnership with Telecam Technology Co.,Ltd following a successful collaboration at IBC 2022, in Amsterdam.

Telecam Technology Co.,Ltd is a certified and reliable Pan-Tilt-Zoom (PTZ) camera manufacturer established in 2014 by a group of enthusiasts who have been dedicated to video camera processing solutions for decades.

3D Storm, the n°1 NDI® Specialist in EMEA, is the high value-added distributor specializing in tools for video over IP, video live production, streaming and software driven video production technology.

The brand Telycam, by **Telecam Technology Co.,Ltd**, will now be part of the 3D Storm offering with the latest generation of NDI® PTZ cameras, supporting NDI®|HX, NDI®|HX3 & Full NDI®. All cameras are covered by a 3-year manufacturer's warranty and immediately available from stock.

“Telycam focuses on providing broadcast-level live streaming PTZ cameras. With our one-stop NDI® PTZ camera series, we help people create video content at an affordable cost and “share & connect” with their audiences easily. Now with the help of 3D Storm, we are ready to share our solutions in Europe.” Jenny Liu, Telycam Marketing Manager.

“3D Storm is thrilled to start a new adventure with Telycam in Europe. All Telycam NDI® PTZ cameras are now an integral part of the 3D Storm offer, including the new TLC-300 Full NDI® PTZ Camera created by Telycam in collaboration with Kiloview. This new addition will complete and develop the NDI® solutions for 3D Storm customers with an excellent value for money.” Franck Lafage, 3D Storm CEO.

The new Telycam NDI® PTZ cameras have already made a big impression during their first presentation at IBC 2022. A demonstration of the NDI® PTZ cameras & controller will be carried out at SATIS in Paris, next November, as well as at ISE, at the beginning of 2023.
