

NewTek TriCaster + Titler Live 4 Broadcast

Buy NewBlue Titler Live 4
BroadCast together with
and save 900 €

Native TriCaster Integration

Built with NewTek™ TriCaster, in mind, Titler Live 4 Broadcast supports up to 16 4k NDI Key & Fill graphics. Works with TriCaster's NDI Macro commands and connects to NewTek DataLink.

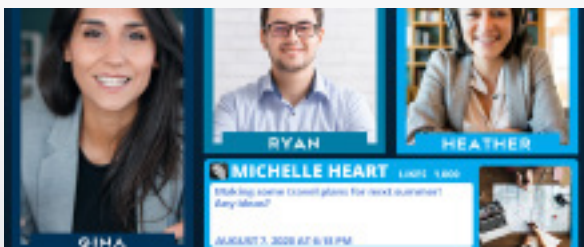

Comprehensive Data Automation

Power your graphics with NewBlue's patented data controllers: JSON, XML, TXT & CSV/XLS supported. Pull data from scoreboards, Facebook, YouTube, Twitter, RSS, DataLink, & custom APIs.

End-to-End Graphics Production

Create stunning animated, multi-layer 3D graphics in the built-in Title Designer. Design in minutes using drag-and-drop templates or import designs from Photoshop, After Effects, and more.

Built for Tomorrow

Titler Live 4 Broadcast's patented engine delivers unlimited graphics per channel, asynchronous data-driven text updates, NDI graphics mapping (for PiP), and cross-platform compatibility.
